

Legally Traceable Time®

TRACEABLE TO:

- UTC** (Universal Coordinated Time)
- NIST** (National Institute of Standards and Technology)
- USNO** (United States Naval Observatory)
- BIPM** (Bureau Internationale de Poids et Mesures)

Accurate, legally traceable time within an organization reduces risk and liability, supports critical applications and regulatory compliance and improves network manageability.

Orolia NetClock® systems are based on GPS technology for direct traceability to the NIST and the world standard of time so your network and applications are always legally traceable.
