Low Cost / Profile High resolution Frequency Stability Measurement Test Set

1. New software installation

The monitoring software being written in an older version of Visual Basic, it was not possible to create a new deployment package. Therefore, it is suggested to proceed as following.

Information given here are for **Windows 10**:

1. Download *picotime_rs_2-0.zip* from Spectratime website
2. Install it as usual
3. Download *add_03.zip* from Spectratime website
4. Copy *PicotimeRS_03.exe* and *settingGLOBAL.txt* in the directory where *PicotimeRS.exe* was installed and make *PicotimeRS_03.exe* active.

Trick to make ports up to 255 active

1. Copy MSCOMM32.OCN to C:\Windows\SysWOW64
2. Rename MSCOMM32.OCX to MSCOMM32.OCL
3. Rename MSCOMM32.OCN to MSCOMM32.OCX

Installation problems

- Execute `regsvr32.exe /U problem.ocx` or `problem.dll`
- Execute `regsvr32.exe problem.ocx` or `problem.dll`

Possibly helps
